**Subject:** FW: SPI Anderson

Shane and Eric,

Thanks for taking the time to discuss the SPI GHG application with me. As a follow up to our discussion, below are the items SPI will be providing to EPA. Please let me know if you have any clarifications.

1. Description of the existing kilns at facility.
2. Cost effectiveness data in \$/ton for the catalytic oxidation.
3. Description of boiler features and measures that will be taken to ensure "good boiler design, good combustion practices, and efficient operation," which is provided as a baseline in step 1 of the GHG BACT analysis.

It would be helpful if you could send a response this week. Please let me know if you need more time than this.

Regards,

\*\*\*\*\*
